

Project Design Phase-II

Technology Stack — Architecture Diagram

Date: 01 October 2026

Project: Standard Laptop Procurement

Architecture Interfaces

- Browser → ServiceNow Cloud: requester, approver and administrator access.
- ServiceNow workflow → records: request, approval and Catalog Task creation/update.
- ServiceNow → Hardware Team: Catalog Task assignment.
- External API: none | ML model: none

Project Design Phase-II

Technology Stack — Components & Infrastructure

Date: 01 October 2026Team ID: SWTID-2026-9532Behaviour: APPROVAL

Project: Standard Laptop Procurement Automation in ServiceNow

Table 1 — Technology Components

Layer / Component	Technology / Configuration	Purpose
Presentation	ServiceNow Service Catalog	Provides the Standard Laptop catalog item and request submission interface.
Workflow	ServiceNow Flow Designer	Runs the Standard Laptop task automation after the approval condition is satisfied.
Approval	ServiceNow Approval records	Stores the approval decision for the submitted request.
Fulfilment	ServiceNow Catalog Task	Creates and tracks the Hardware team fulfilment task.
Data	ServiceNow platform records	Stores request, Requested Item, approval and Catalog Task records.
Access	Web browser + ServiceNow user account	Provides authenticated access for requester, approver and Hardware technician.

Table 2 — Infrastructure & Interfaces

Area	Specification
Cloud / Platform	ServiceNow Cloud Platform; active ServiceNow instance with required access.
Operating System	Windows 10/11, macOS, or Linux.
Browser	Google Chrome, Microsoft Edge, or Mozilla Firefox.
Internet	Stable internet connection.
Hardware	Standard computer/laptop with at least 4 GB RAM and 2 GHz processor.
External API	None used by this solution.

Project Design Phase-II

Technology Stack — Security & Access

Date: 01 October 2026Team ID: SWTID-2026-9532Behaviour: APPROVAL

Project: Standard Laptop Procurement Automation in ServiceNow

Security Configuration

Security Area	Requirement / Statement
Execution context	The Standard Laptop task flow runs as System User.
ACL implication	Because the flow runs as System User, it can bypass normal ACL checks during flow execution.
Administrative control	Access to create, edit, activate or modify the flow is limited by who has permission to configure Flow Designer.
User access	Requester, Approver and Hardware users require valid ServiceNow accounts with the roles and permissions assigned by the instance administrator.
Data handling	Request, approval and Catalog Task information remains within the configured ServiceNow platform records.

Technology Stack Summary

- Platform: ServiceNow Cloud Platform
- Application services: Service Catalog, Approval, Flow Designer, Catalog Task
- Data stores: sc_request, sc_req_item, sysapproval_approver, sc_task
- External API: None
- ML model: None
- Flow execution: System User
